

ACat Code – Allows grouping of accounts based on some common factor

- The ACat Code or “Account Category” Is a user defined 2 character, alpha-numeric code that can be assigned at the time the account is placed or added, changed and removed using a Smart Code.
- By setting a flag on the Client Master an ACat Codes can be used to:
- Assign accounts to collectors using special Work Group Codes – You need to set up a Work Group Code that is the same as the ACat Code.
- Assign a special Contact Series – You need to set up the System Control option Contact Series by ACat.
- Make Smart Codes behave differently by using it as an override – You need to set up Smart Codes with overrides that are the same as the ACat Code.

ACat Codes
