

QCAT – Make it easy for collectors to identify a group of accounts and override default sort

- Description will be seen in the Work Map
- Sort Category is your primary sort and the other is your secondary sort.
- Breakpoint days will ignore your sort if accounts have not been worked over XX number of days.
- Best time to work will be seen in the collectors Work Map and use military time.
- D will not delete the code but deactivate the QCat code.
- You can also use the option “QCAT by User” to change sort presentation by UserID

QCat Codes
