

## QUANTRAX CORPORATION INC.

## Queue Consolidation Options - Allows you to automate campaigns through nightly Processing

- •You can create automated queues based on Client Consolidation or User Consolidation. These options are found on the I-Tel queue consolidation Menu.
- •You do not need the I-Tel dialer to use these options.
- Automate and Manage Campaigns through nightly Processing.
- · Build different campaigns daily.
- •Robust Account selection options
- •Adding Tab+ phone numbers to Campaigns
- Campaign build priority options
- •Create large campaigns, remove accounts from campaigns and create new calling lists during the day.

## Queue Consolidation Options - Allows you to automate campaigns through nightly Processing

- •The user and client consolidation options allow very similar selection criteria.
- The processing type is required for both consolidation options to run.
- Consolidation options can be run in a batch mode or interactive, when not processed during nightly.
